

The process has reached a stable place where it is now very straight forward to get the teams and players from game day to marlow st in a few clicks.

1. Login to game day and find the current season competition you want to export.

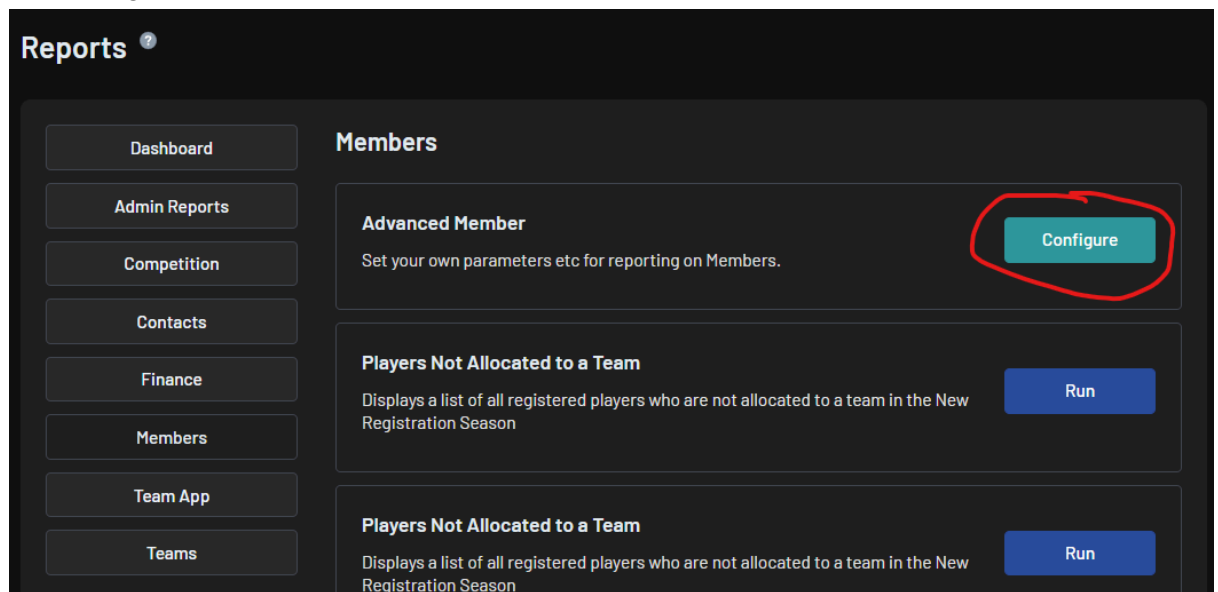

The screenshot displays the GAMEDAY web application interface. At the top, there is a header with the GAMEDAY logo, a small AFPA logo, and a search bar. Below the header, a sidebar on the left contains a navigation menu with options: Dashboard (selected), Fixtures, Teams, Match Results, Statistics, and Reports. The main content area is titled 'Competition Configuration' with an 'Edit' link. It displays a table of configuration settings for the 'Season 21 Q1 2026' competition.

Competition Configuration	
Active	Yes
Abbreviation	S21 Q1 26
Season	2026
Type	Tournament
Division	N/A
Age Group	Open Age
Gender	Mixed
Number of Teams	30
Number of Rounds	11

2. Then click on the Reports button. It can be found on the left hand side of the screen in the menu bar.

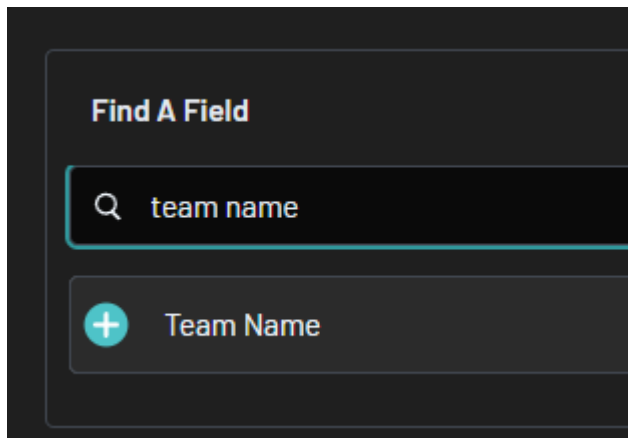

3. Select “Members” from the menu, find the “Advanced Member” section and then click the “configure” button.

4. It should take you to a page that looks like this. If you have created a report in this same browser previously you will be able to “restore” it and it will appear under the “saved report” section. However assuming this is your first time generating the report it will look more like this:

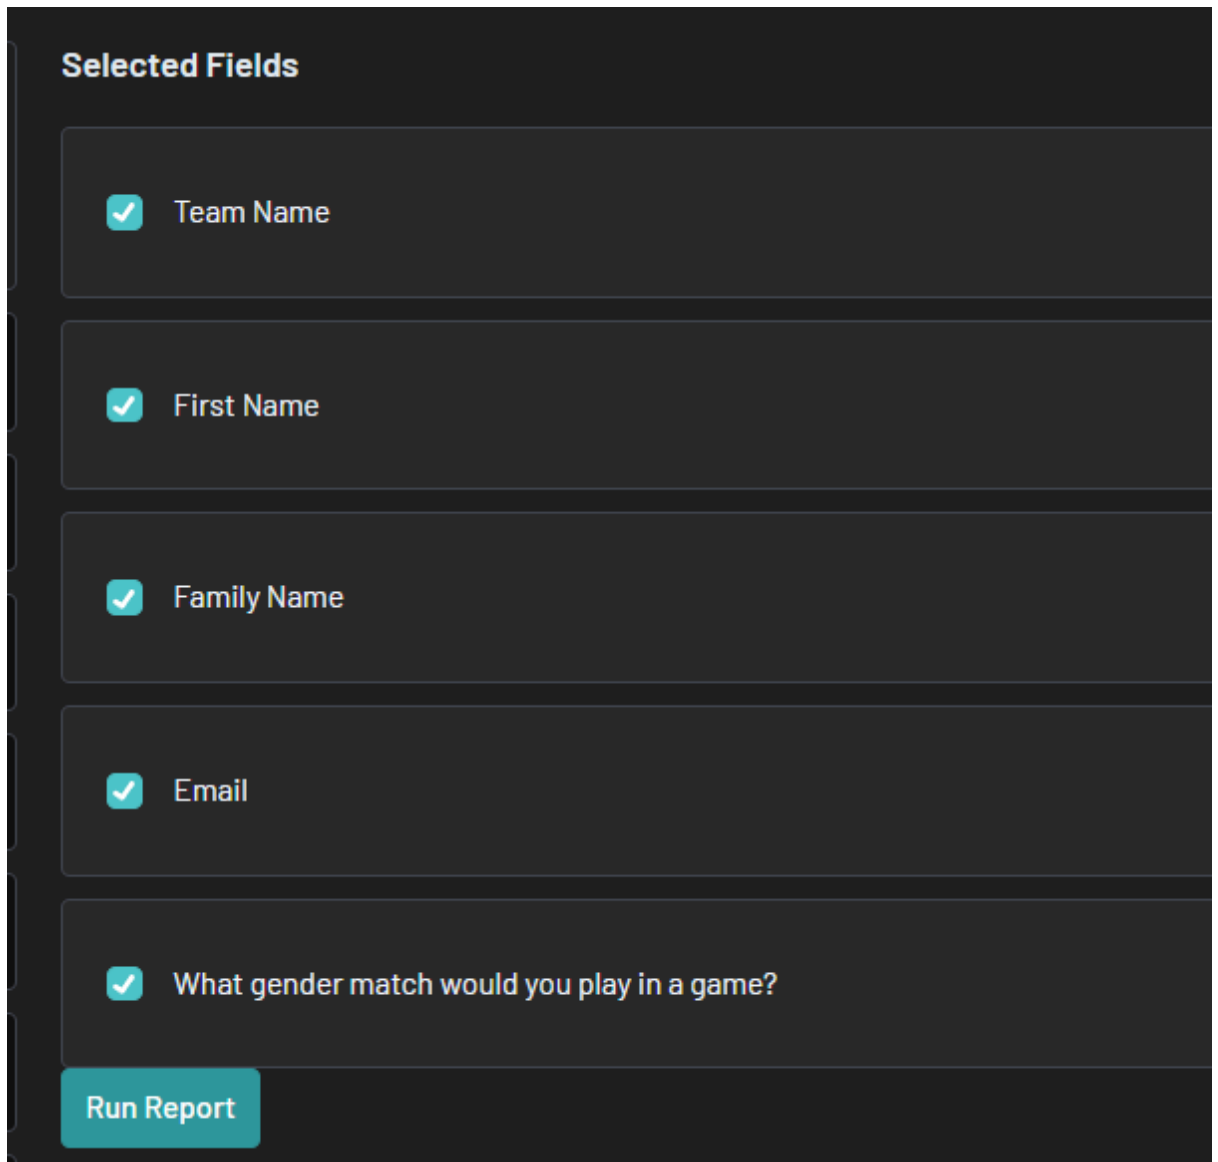

The screenshot shows a report configuration page. On the left is a sidebar with a "Find A Field" search bar and a list of categories: Personal Details, Contact Details, Interests, Parent/Guardian, Financial, Medical, Other Fields, Member Type - Player, Member Type - Coach, Member Type - Match Official, Member Type - Game Advisor, and Member Type - Other. The main content area has a "Run Report" button at the top. Below it is the "Options" section with radio buttons for "Show" (Unique Records Only, Summary Data, All Records), dropdowns for "Sort by" (AFDA Number), "Secondary sort by" (None), and "Group By" (No Grouping), each with an "Ascending" dropdown. The "Report Output" section has radio buttons for "Display" (selected) and "Email", a "Report Format" dropdown (Tab Delimited), and an "Email Address" field (marlowstreetultimate@gmail.com). At the bottom is a "Saved Reports" section with a "Save" button and a question mark icon.

5. Add the fields you want to export to the report. This can be done by typing the name of the field into the “Find a field” input box, and then clicking the + plus sign to add it.

The screenshot shows a dark-themed interface with a section titled "Find A Field". Below the title is a search input box containing the text "team name" and a magnifying glass icon. Below the input box is a list of search results, with the first item being a teal circle containing a white plus sign, followed by the text "Team Name".

6. The fields to add are (in this exact order): team name, first name, family name, email, and gender.

The screenshot shows a dark-themed interface with a section titled "Selected Fields". Below the title is a list of five items, each with a teal circle containing a white checkmark, followed by the field name: "Team Name", "First Name", "Family Name", "Email", and "What gender match would you play in a game?". At the bottom of the list is a teal button with the text "Run Report".

- Before hitting “run report” change the output to “csv” (which helps with some versions of excel). Then click run report and you should see the output in a new tab in your browser.

Report Output

Choose how you want to view the data from this report.

☒ Display ☐ Email

Open the report to display in a new tab Email the report to

Report Format: CSV

Email Address: ultimate@gmail.com

- Copy pasting that into an excel or google doc is the easiest way to prepare it for upload. You will need to rename the **Headers** (titles of each column) to match what the Marlowst site expects. The resulting document should look something like this:

	A	B	C	D	E
1	team_name	first_name	last_name	email_address	gender
2	The Next Big Fling	Will	Owers		male
3	The Next Big Fling	Carolyn	Scriba		male
4	The Next Big Fling	Zane	Chapman		male
5	The Next Big Fling	Noah	Chapman		male
6	The Next Big Fling	Chiara	Folland		male
7	The Next Big Fling	Veer	Parmar		male
8	The Next Big Fling	Leah	Roberts		male

The marlowst website also tells you what format it expects the data to look like when you attempt to upload it here which acts as a good reminder:

Marlow Street

Fixtures Ladder Reports Teams Users

Import CSV

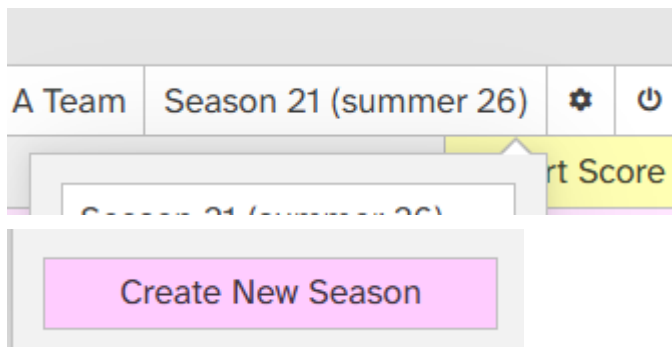

Import CSV

The expected headings in the CSV are:

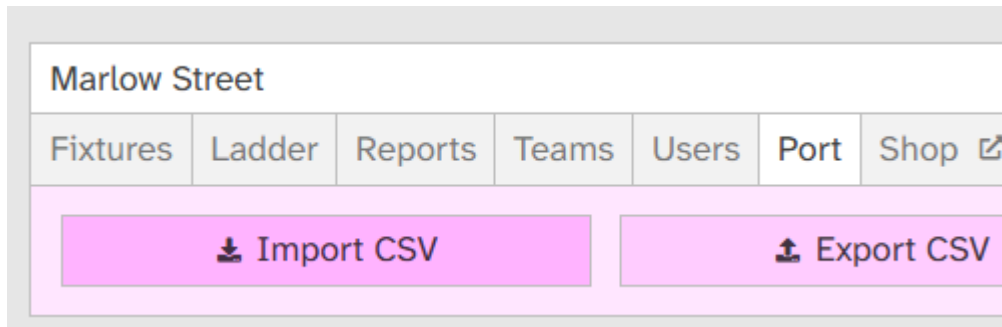

- team_name
- team_division (optional)
- first_name
- last_name
- email_address
- gender

Select File

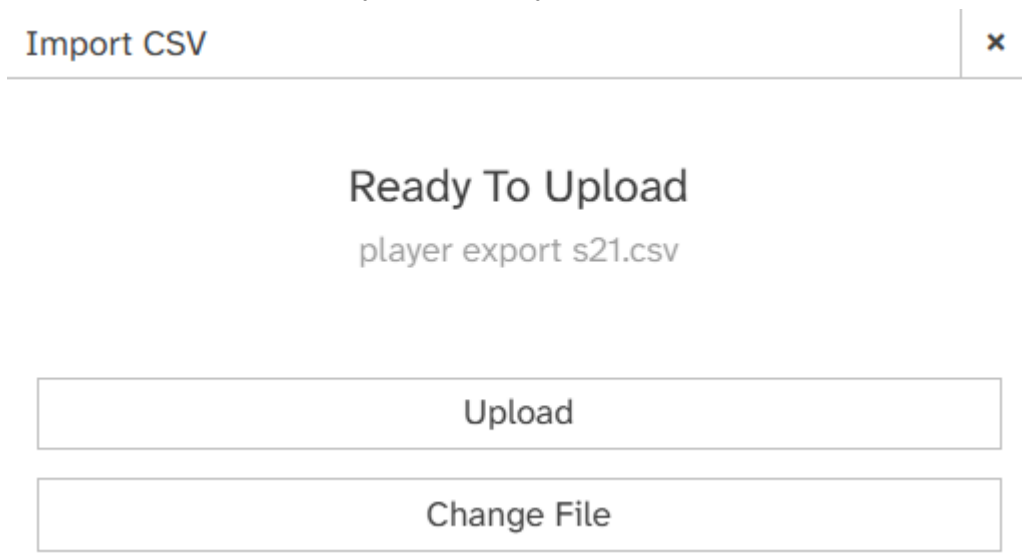

- Save this spreadsheet to your computer somewhere sensible in the **CSV** format where you will remember it.
- Navigate to the marlowst.com website and login as an administrator account. Create a new season (if you haven't already) by selecting the Season button in the top right

11. Then select the “port” tab along the top and click on the Import csv button.

12. Select the exported csv file you previously saved and then click Upload

13. And you should be done!
